A non-federal public safety entity may communicate on designated Federal Interoperability Channels for joint federal/non-federal operations, provided it first obtains a license from the Commission authorizing use of the channels. Statutory authority for these collections are contained in 47 U.S.C. §§ 151, 154, 301, 303, and 332 of the Communications Act of 1934.

Nature and Extent of Confidentiality: Applicants who include written concurrence from their SWIC or state appointed official with their application to license mobile and portable units on the Federal Interoperability Channels need not include any confidential information with their application. Although ULS stores all information pertaining to the individual license via an FCC Registration Number (FRN), confidential information is accessible only by persons or entities that hold the password for each

account, and the Commission's licensing staff. Any personally identifiable information (PII) that individual applicants provide is covered by a system of records, FCC/WTB-1, "Wireless Services Licensing Records," and these and all other records may be disclosed pursuant to the Routine Uses as stated in this system of records notice.

Needs and Uses: This collection will be submitted as an extension of a currently approved collection after this 60-day comment period to the Office of Management and Budget (OMB) in order to obtain the full three-year clearance. The purpose of requiring a non-federal public safety entity to obtain written consent from its SWIC or state appointed official before communicating with federal government agencies on the Federal Interoperability Channels is to ensure that the non-federal public safety entity operates in accordance with the rules and procedures governing use of the federal interoperability channels and does not cause inadvertent interference during emergencies. Commission staff will use the written concurrence from the SWIC or state appointed official to determine if an applicant's proposed operation on the Federal Interoperability Channels conforms to the terms of an agreement signed by the SWIC or state appointed official with a federal user with a valid assignment from the National Telecommunications and Information Administration (NTIA) which has jurisdiction over the channels.
